

## 1998 - 2003 Toyota Sienna Clock Fuse Info

Before you remove the Sienna Clock, please check to be sure that the fuse controlling the clock module is OK.

A 15 A mini-blade fuse (blue color) controls cigarette light, clock and power back view mirror. The fuse is located in the inside fuse box that is under dash board on the left side of the drive side. You will see fuses once the coins tray is removed and a diagram of the fuse location is printed on the back of coin tray.
